

# THE EMERGENCY DEPARTMENT

## Considerations for Innovation & Strategic Design

A Pebble-In-Practice Workshop

## May 11-12, 2016 – Chicago, IL

Designing and building a new or renovating an existing emergency department is a high stakes opportunity. Today, more than ever, emergency department directors balance a range of competing priorities, including:

- increased volume and overcrowding
- patient acuity and behavioral health
- Safety vs. Satisfaction
- delayed “up-stream” throughput, and system bottle-necks

Attend this 2 day event and learn how to quantify and measure those challenges and explore design innovations, processes and facility based solutions. Obtain insight into:

- optimal patient flow
- researched-based process
- design interventions and strategies to improve clinical outcomes, quality of care, and patient safety and satisfaction
- how to employ proven physical design strategies and methodologies

Taught by nationally recognized clinical and design experts, the workshop offers a review of design methodologies, case studies and ED benchmark data inherent in running today’s emergency departments.

For a complete list of faculty and to register visit: [www.healthdesign.org/events/21](http://www.healthdesign.org/events/21)

### WHO SHOULD ATTEND

- Emergency department directors, physicians, nurses and managers
- Healthcare executives with facilities, planning, capital investment and ED oversight roles
- Healthcare architects, designers, suppliers and consultants

11 CEU CREDITS

### REGISTER TODAY

EARLY BIRD  
**REGISTRATION**  
\$795

Additional registrants from  
same company – **10% off**

After March 30, 2016  
\$895.00

Questions? Contact  
Alison Berger, Project Manager  
925.521.9404 ext. 129

### PROGRAM HIGHLIGHTS

The Global Context—Today’s Challenges and Performance Measures for the ED

Key Drivers and Future Trends in the ED—Process and Facility Improvement, Throughput and Technology

Tools and Techniques for Optimal ED Design and Flow

The LEAN ED

Case Studies- Streamlined processes at Ellis Medicine, The Free Standing ED at Cleveland Clinic, and Disaster Preparedness

Simulations that Explore ED Layout and Technology

Produced in partnership with:
