Knowledge Repository News

The past two months brings you nearly 80 more entries into the Knowledge Repository spanning a range of topics. While one new entry in the Knowledge Repository is not specifically related to healthcare design or even the built environment, we found it to be especially pertinent to how we think about evaluating healthcare settings – most notably a discussion about a complexity-informed approach. This is an open access study, so just click on the DOI, and it will take you there!

(Papers published ahead of print “in press” will be updated as volume and page information becomes available.)

September-October 2018

Experience

Perceived Quality of Care  (Noise, Communication, Waiting)

Supportive Design (e.g., Social Support, Positive Distractions)

15. Paraskevopoulou, A. T., & Kamperi, E. (2018). Design of hospital healing gardens linked to pre- or post-occupancy research findings. *Frontiers of Architectural Research*, in press. [https://doi.org/10.1016/j.foar.2018.05.004](https://doi.org/10.1016/j.foar.2018.05.004)

Indoor Environmental Quality (e.g., Temperature, Air, Light)

Design & Evaluation (e.g., Process, Methods)

### Safety

### Infection Prevention/Control
