

RESEARCH IN A SNAP

OVERVIEW

We're keeping you updated on papers added to The Center's Knowledge Repository.

The Knowledge Repository is provided with the funding support of:

Academy of
Architecture for Health

an AIA Knowledge Community

Additional key point summaries provided by:

RESEARCH-DESIGN
CONNECTIONS

Knowledge Repository News

Take a minute during this holiday week to let us know how you use the Knowledge Repository? Take a quick survey. <https://www.surveymonkey.com/r/6FM5R3K>

(Published ahead of print "in press" will be updated as volume and page information becomes available.)

May-June 2018

Infection Prevention/Contamination

1. Almeida, D., Cristovam, E., Caldeira, D., Ferreira, J. J., & Marques, T. (2016). Are there effective interventions to prevent hospital-acquired Legionnaires' disease or to reduce environmental reservoirs of Legionella in hospitals? A systematic review. *American Journal of Infection Control*, 44(11), e183-e188. <https://doi.org/10.1016/j.ajic.2016.06.018>
2. Cadnum, J. L., Mana, T. S. C., Jencson, A., Thota, P., Kundrapu, S., & Donskey, C. J. (2015). Effectiveness of a hydrogen peroxide spray for decontamination of soft surfaces in hospitals. *American Journal of Infection Control*, 43(12), 1357-1359. <https://doi.org/10.1016/j.ajic.2015.07.016>
3. Coppin, J. D., Villamaria, F. C., Williams, M. D., Copeland, L. A., Zeber, J. E., & Jinadatha, C. (2017). Self-sanitizing copper-impregnated surfaces for bioburden reduction in patient rooms. *American Journal of Infection Control*, 45(6), 692-694. <https://doi.org/10.1016/j.ajic.2017.01.012>
4. Dziejwulski, D. M., Ingles, E., Codru, N., Strepelis, J., & Schoonmaker-Bopp, D. (2015). Use of copper-silver ionization for the control of legionellae in alkaline environments at health care facilities. *American Journal of Infection Control*, 43(9), 971-976. <https://doi.org/10.1016/j.ajic.2015.05.018>
5. Esolen, L. M., Thakur, L., Layon, A. J., Fuller, T. A., Harrington, D.-J., Jha, K., & Kariyawasam, S. (2018). The efficacy of self-disinfecting bedrail covers in an intensive care unit. *American Journal of Infection Control*, 46(4), 417-419. <https://doi.org/10.1016/j.ajic.2017.09.026>
6. Harnoss, J.-C., Assadian, O., Karl Diener, M., Müller, T., Baguhl, R., Dettenkofer, M., ... Kramer, A. (2017). Microbial Load in Septic and Aseptic Procedure Rooms. *Deutsches Ärzteblatt International*, 114(27-28), 465-472. <https://doi.org/10.3238/arztebl.2017.0465>

7. Lax, S., Smith, D., Sangwan, N., Handley, K., Larsen, P., Richardson, M., ... Gilbert, J. A. (2017). Colonization and Succession of Hospital-Associated Microbiota. *Science Translational Medicine*, 9(391), 1–11. <https://doi.org/10.1126/scitranslmed.aah6500>
8. Lenaghan, P. A., & Schwedhelm, M. (2015). Nebraska Biocontainment Unit Design and Operations. *Journal of Nursing Administration*, 45(6), 298–301. <https://doi.org/10.1097/NNA.0000000000000202>
9. Njuangang, S., Liyanage, C., & Akintoye, A. (2018). The history of healthcare facilities management services: a UK perspective on infection control. *Facilities*, 36(7/8), 369–385. <https://doi.org/10.1108/F-07-2016-0078>
10. Parvizi, J., Barnes, S., Shohat, N., & Edmiston, C. E. (2017). Environment of care: Is it time to reassess microbial contamination of the operating room air as a risk factor for surgical site infection in total joint arthroplasty? *American Journal of Infection Control*, 45(11), 1267–1272. <https://doi.org/10.1016/j.ajic.2017.06.027>
11. Perez, P., Holloway, J., Ehrenfeld, L., Cohen, S., Cunningham, L., Miley, G. B., & Hollenbeck, B. L. (2018). Door openings in the operating room are associated with increased environmental contamination. *American Journal of Infection Control*, in press. <https://doi.org/10.1016/j.ajic.2018.03.005>
12. Quinn, M. M., Henneberger, P. K., Braun, B., Delclos, G. L., Fagan, K., Huang, V., ... Zock, J.-P. (2015). Cleaning and disinfecting environmental surfaces in health care: Toward an integrated framework for infection and occupational illness prevention. *American Journal of Infection Control*, 43(5), 424–434. <https://doi.org/10.1016/j.ajic.2015.01.029>
13. Shaw, L. F., Chen, I. H., Chen, C. S., Wu, H. H., Lai, L. S., Chen, Y. Y., & Wang, F. D. (2018). Factors influencing microbial colonies in the air of operating rooms. *BMC Infectious Diseases*, 18, 4. <https://doi.org/10.1186/s12879-017-2928-1>
14. Sifri, C. D., Burke, G. H., & Enfield, K. B. (2016). Reduced health care-associated infections in an acute care community hospital using a combination of self-disinfecting copper-impregnated composite hard surfaces and linens. *American Journal of Infection Control*, 44(12), 1565–1571. <https://doi.org/10.1016/j.ajic.2016.07.007>
15. Steinkuller, F., Harris, K., Vigil, K. J., & Ostrosky-Zeichner, L. (2018). Outpatient Infection Prevention: A Practical Primer. *Open Forum Infectious Diseases*, 5(5), 1–8. <https://doi.org/10.1093/ofid/ofy053>
16. Tamimi, A. H., Carlino, S., & Gerba, C. P. (2014). Long-term efficacy of a self-disinfecting coating in an intensive care unit. *American Journal of Infection Control*, 42(11), 1178–1181. <https://doi.org/10.1016/j.ajic.2014.07.005>

17. von Dessauer, B., Navarrete, M. S., Benadof, D., Benavente, C., & Schmidt, M. G. (2016). Potential effectiveness of copper surfaces in reducing health care-associated infection rates in a pediatric intensive and intermediate care unit: A nonrandomized controlled trial. *American Journal of Infection Control*, 44(8), e133–e139. <https://doi.org/10.1016/j.ajic.2016.03.053>

Other Patient Safety Topics

18. Bayramzadeh, S., Portillo, M., & Carmel-Gilfilen, C. (2018). Understanding Design Vulnerabilities in the Physical Environment Relating to Patient Fall Patterns in a Psychiatric Hospital: Seven Years of Sentinel Events. *Journal of the American Psychiatric Nurses Association*, in press. <https://doi.org/10.1177/1078390318776086>
19. Zhao, Y. L., & Kim, H. (2015). Older Adult Inpatient Falls in Acute Care Hospitals: Intrinsic, Extrinsic, and Environmental Factors. *Journal of Gerontological Nursing*, 41(7), 29–43. <https://doi.org/10.3928/00989134-20150616-05>

Operating Suite Design (See Infection Prevention, as well)

20. Ashour, R., See, A. P., Dasenbrock, H. H., Khandelwal, P., Patel, N. J., Belcher, B., & Aziz-Sultan, M. A. (2016). Refinement of the Hybrid Neuroendovascular Operating Suite: Current and Future Applications. *World Neurosurgery*, 91, 6–11. <https://doi.org/10.1016/j.wneu.2016.03.055>
21. Doshi, R. R., & Vann, M. A. (2017). Organization of a Sedation Suite: Setting the Standards. In *Out of Operating Room Anesthesia* (pp. 71–81). Springer, Cham. https://doi.org/10.1007/978-3-319-39150-2_6
22. Mori, R., Yuki, I., Kajiwara, I., Nonaka, Y., Ishibashi, T., Karagiozov, K., ... Murayama, Y. (2016). Hybrid Operating Room for Combined Neuroendovascular and Endoscopic Treatment of Ruptured Cerebral Aneurysms with Intraventricular Hemorrhage. *World Neurosurgery*, 89, 727.e9–727.e12. <https://doi.org/10.1016/j.wneu.2016.01.010>
23. Roh, T. P., Huschka, T. R., Brown, M. J., & Marmor, Y. N. (2014). Data-driven simulation use to determine bed resource requirements for the redesign of pre- and post-operative care areas. In *Proceedings of the Winter Simulation Conference 2014* (pp. 1168–1176). Savannah, GA. <https://doi.org/10.1109/WSC.2014.7019974>

Design for Special Populations

24. Ahmadi, A., Seyedin, H., & Fadaye-Vatan, R. (2015). Towards Age-Friendly Hospitals in Developing Countries: A Case Study in Iran. *Health Promotion Perspectives*, 5(1), 42–51. <https://doi.org/10.15171/hpp.2015.006>

25. Macdonald, A. S., & Robinson, L. (2016). Care at the End of Life: Design Priorities for People with Dementia. In *Innovation in Medicine and Healthcare 2015* (pp. 517–526). Springer, Cham. https://doi.org/10.1007/978-3-319-23024-5_47
26. Pantartzis, E., Peeters, R., & Price, A. D. F. (2016). Transition from health and social care buildings to use-needs oriented environments of care for people living with dementia (pp. 1–9). Presented at the 24th IFHE Congress, The Hague, the Netherlands.
27. Pantartzis, E., Price, A. D. F., & Pascale, F. (2016). A built environment response to the rising costs of dementia. *Journal of Financial Management of Property and Construction*, *21*(2), 160–187. <https://doi.org/10.1108/JFMPC-06-2015-0019>
28. Smith, D., & Macdonald, J. (2015). Design as a Rehabilitative Tool for People with Acquired Brain Injury: Mapping the Field. *Journal of Interior Design*, *40*(3), 21–38. <https://doi.org/10.1111/joid.12048>
29. van den Berg, J., Bäck, F., Hed, Z., & Edvardsson, D. (2017). Transition to a New Neonatal Intensive Care Unit: Positive Effects on Staff Working Environment and How the Physical Environment Facilitates Family-Centered Care. *The Journal of Perinatal & Neonatal Nursing*, *31*(1), 75. <https://doi.org/10.1097/JPN.000000000000232>
30. van den Bosch, K. A., Andringa, T. C., Post, W. J., Ruijsenaars, W. A., & Vlaskamp, C. (2018). The relationship between soundscapes and challenging behavior: A small-scale intervention study in a healthcare organization for individuals with severe or profound intellectual disabilities. *Building Acoustics*, *25*(2), 123–135. <https://doi.org/10.1177/1351010X18775022>

Lighting

31. Kim, J. J., Esposito, T., Maniccia, D., & Rizzo, P. (2017). Analysis of spectral power distributions for multichannel platforms in a patient room application. In *SPIE Proceedings Vol. 10378* (pp. 1–11). International Society for Optics and Photonics. <https://doi.org/10.1117/12.2274528>
32. Mehrotra, S., Basukala, S., & Devarakonda, S. (2015). Effective Lighting Design Standards Impacting Patient Care: A Systems Approach. *Journal of Biosciences and Medicines*, *03*(11), 54–61. <https://doi.org/10.4236/jbm.2015.311006>

HVAC/Energy Use/Air quality

33. Baurès, E., Blanchard, O., Mercier, F., Surget, E., le Cann, P., Rivier, A., ... Florentin, A. (2018). Indoor air quality in two French hospitals: Measurement of

- chemical and microbiological contaminants. *Science of The Total Environment*, 642, 168–179. <https://doi.org/10.1016/j.scitotenv.2018.06.047>
34. Capozzoli, A., Piscitelli, M. S., Neri, F., Grassi, D., & Serale, G. (2016). A novel methodology for energy performance benchmarking of buildings by means of Linear Mixed Effect Model: The case of space and DHW heating of out-patient Healthcare Centres. *Applied Energy*, 171, 592–607. <https://doi.org/10.1016/j.apenergy.2016.03.083>
35. Chan, A. L. S. (2018). Evaluating the impact of photovoltaic systems on the thermal performance of buildings and its implication to building energy code. A case study in subtropical Hong Kong. *Energy Policy*, 119, 674–688. <https://doi.org/10.1016/j.enpol.2018.04.041>
36. Fifield, L. J., Lomas, K. J., Giridharan, R., & Allinson, D. (2018). Hospital wards and modular construction: Summertime overheating and energy efficiency. *Building and Environment*, 141, 28–44. <https://doi.org/10.1016/j.buildenv.2018.05.041>
37. Kajander, J.-K., Sivunen, M., & Junnila, S. (2014). Valuing Indoor Air Quality Benefits in a Healthcare Construction Project with Real Option Analysis. *Buildings*, 4(4), 785–805. <https://doi.org/10.3390/buildings4040785>
38. Kermani, A. (2015). CFD Modeling for Ventilation System of a Hospital Room. In *Proceedings of the 2015 COMSOL Conference* (pp. 1–5). Boston, MA.
39. Rohde, T., & Martinez, R. (2015). Equipment and Energy Usage in a Large Teaching Hospital in Norway. *Journal of Healthcare Engineering*, 6(3), 419–434. <https://doi.org/10.1260/2040-2295.6.3.419>
40. Uścinowicz, P., Chludzińska, M., & Bogdan, A. (2015). Thermal environment conditions in Polish operating rooms. *Building and Environment*, 94, 296–304. <https://doi.org/10.1016/j.buildenv.2015.08.003>
41. Wang, T., Li, X., Liao, P.-C., & Fang, D. (2016). Building energy efficiency for public hospitals and healthcare facilities in China: Barriers and drivers. *Energy*, 103, 588–597. <https://doi.org/10.1016/j.energy.2016.03.039>

Facility Management Related
