Presents

Pebble In Practice Workshops

How a Functional Program Can Help Shape the Future September 16, 2015 ♦ Steelcase WorkLife Center ♦ New York City

Has the functional program been making your head spin? Have you wondered why it's required in the FGI Guidelines? The functional program considers the key components and stakeholders for creating a successful project that meets an organization's strategic goals and bottom line. Work with members of The Center for Health Design's Environmental Standards Council (ESC) to understand how the functional program will **help** your planning process, not hinder it.

This fully interactive one-day workshop will dive deep into the functional program's intent and purpose through **application**. Attendees will work in collaborative groups to create a functional program using a fictional example and guidance from the workshop faculty. The goal of the workshop is for attendees to leave with an understanding of how functional programs are actually generated, as well as the benefit and opportunity a functional program can provide. Additionally, ideas and key considerations that result from this workshop will be incorporated into the work of The Center for Health Design's Environmental Standards Council for recommendations to the 2018 FGI Guidelines.

Time	Description
9:30 am	Registration Open
10:00 am	The Functional Program – a brief look at the history, evolution, and purpose of the Functional Program Tom Jung, RA Healthcare Planning & Design Consultant, Thomas M. Jung Consulting, LLC.
10:30 am	Presentation of the case scenario – an introduction to the fictional case scenario that will be used during collaborative workgroups Richard Thomas, AIA, MBA
10:45 am	Morning Break
10:55 am	The owner's perspective Richard Thomas, AIA, MBA Understand the owner's goals, questions, and concerns when assembling a project team to create an effective functional program.

11:10 am	<p>The design team’s perspective - architecture and site & building planning</p> <p>Alberto Salvatore, AIA, NCARB, EDAC Associate Principal, Perkins+Will</p> <p>Jerry Smith, FASLA, EDAC, LEED AP Principal, SMITH GreenHealth Consulting, LLC</p> <p>Learn how an Interdisciplinary Design Team approach to identifying the problem and the use of the Environment of Care concept can be used as tools to inform the process and increase the likelihood of a more accurate and effective functional program.</p>
11:40 am	<p>The AHJ’s perspective</p> <p>Tom Jung, RA Healthcare Planning & Design Consultant, Thomas M. Jung Consulting, LLC.</p> <p>The AHJ, traditionally in an “oversight” role, faces continuing resource constraints that can confound project timing and level of review. Learn how the FP can facilitate the AHJ function and help avoid costly delays.</p>
11:55 am	<p>The Patient Perspective</p> <p>Cathy Dolan-Schweitzer President, Health Well Done</p>
12:10 pm	<p>Collaborative Discussions /Faculty Shared Expertise & Working Lunch - attendees use provided case scenario to explore functional program issues while owner, architect, regulator, landscape and site planner rotate through interactive workgroups providing perspective, key considerations and feedback.</p>
3:15 pm	<p>Afternoon Break</p>
3:30 pm	<p>Group report out - summary to include key take-aways, challenges and unresolved issues</p>
4:45 pm	<p>Closing Remarks</p>

The Environmental Standards Council (ESC) is a volunteer group committed to improving the regulatory standards of the *Guidelines for the Design and Construction of Healthcare Facilities*. It is a multidisciplinary group that includes healthcare facility executives, design professionals, regulatory agents, product manufacturers and educators.
