1. The role of the circulating nurse in the operating room is to (select the correct answer):
   a. Support the needs of the surgeon by providing him/her necessary instruments and supplies for surgery
   b. Observe, monitor and manage potential threats at and around the surgical field
   c. To perform surgery in outpatient surgical environments
   d. To communicate with patients’ families regarding their status

2. The circulating nurse work requires travel within the OR as well as to areas outside the OR
   a. True
   b. False

3. The key functional zones in the operating room include (select all that apply):
   a. Circulating nurse' workstation
   b. Surgical table
   c. Anesthesia zone
   d. Induction room

4. The two categories of surgical flow disruptions that were evaluated in this study include (select the two that apply)
   a. Interruptions
   b. Layout
   c. Usability
   d. Environmental hazard
   e. Equipment related disruptions
