1. What is the primary purpose for the use of telemedicine?
   a) To provide access to health assessment
   b) To provide diagnosis
   c) To provide consultation
   d) To provide diagnosis
   e) All of the above

2. The FGI Guidelines requirements for telemedicine are ________________ for all existing facilities?

3. Both locations for telemedicine are considered:
   a) Patient care procedure rooms
   b) Office spaces with special accommodations
   c) Open spaces of hospitals and clinics
   d) Examination rooms
   e) None of the above

4. The following is required in all telemedicine spaces:
   a) Examination table
   b) Dimmable lighting
   c) Window
   d) Facility identification
   e) None of the above

NOTE: To have your credit uploaded to the AIA, you must purchase a CEU Management fee from The Center for Health Design store. This $10.00 fee covers the administrative cost of uploading CEUs to the AIA. https://www.healthdesign.org/store/products/events-webinars
5. The room used for telemedicine shall include the following:
   a) A desk between the caregiver and patient
   b) Hand washing station where hands-on patient examination is provided
   c) A minimal ceiling height of nine feet
   d) View of the outside
   e) None of the above

6. The placement of the camera has an effect on:
   a) Eye gaze angle
   b) Observation of emotion
   c) Ability to view the entire upper body
   d) Gait evaluation
   e) All of the above

7. Lighting in a telemedicine exam space should account for:
   a) Control of glare
   b) Lighting of the perimeter walls
   c) All fixtures being on a dimmer
   d) An incandescent light fixture over the patient

8. Interior surfaces of a telemedicine area:
   a) Should be bold and cheery to assist with patient satisfaction
   b) Should have a matte finish to absorb light
   c) Highly reflective to brighten up the room and exam area
   d) As with an operating room green in color so red and pink are more prevalent

9. Reducing ______________ clutter will assist in keeping the caregiver on the viewing side more focused on the exam.

10. Telemedicine rooms need to have acoustical properties that:
    a) Avoid outside sounds being picked up by the microphones
    b) Soundproofed, or away from noise producing equipment
    c) Avoid noise from hallways, waiting room or restrooms
    d) Designed for speech intelligibility
    e) All of the above
