1. How was the Universal Operating room defined:
   a) any case, any room
   b) all rooms were of the same size and same handedness
   c) equipment required by various services could be accommodated in the room
   d) all of the above

2. The simulation-based mock-up evaluations resulted in the following design modifications:
   a) Relocating the door to the sterile core
   b) Moving the locations where booms are mounted
   c) Design modifications to the physician and nursing workstations
   d) All of the above

3. Individuals who enacted the simulation scenarios included:
   a) Members of the design team
   b) OR management
   c) Clinicians (surgeons, anesthesiologists, nurses, etc.)
   d) Students

4. The simulation-based mock-up evaluation resulted in the following outcomes:
   a) better room utilization
   b) fewer constraints with equipment mobility
   c) decreased congestion
   d) all of the above
